Your diskspace how does it work?

[Click here to read this manual in PDF](#)

To let the messages or web pages be more fun, Omni-Chat has the ability to upload images to the server or to insert images into the messages. Here is a manual to make it easier to upload files, organize your disk space and make it easier to place your images. This manual is divided into three parts namely:

- I. Creating and managing your folders.
- II. Uploading and managing of your images.
- III. Create more disk space space.

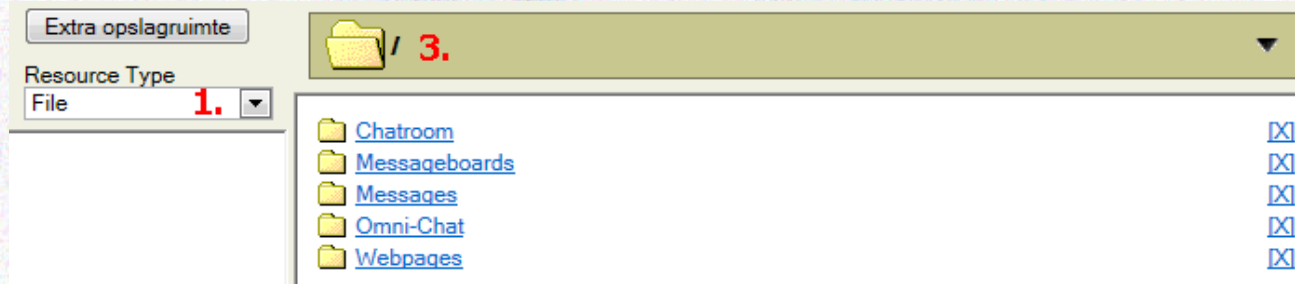

How to do this?

- Creating and managing your folders.

Make sure you are logged in on the homepage of Omni-Chat and with a valid account and click click in the left column on "My disk space" of on the tab "Groups" en then as the red arrow shows.

In both cases the following screen appears:

2.

 Create New Folder

Upload a new file in this folder

 Bladeren...

 Upload

1. By clicking  you can select a source type. We distinguish the following source types:

File: meant for files.
Image: meant for images.
Flash: meant for flashfiles.
Media: meant for movies and musicfiles.

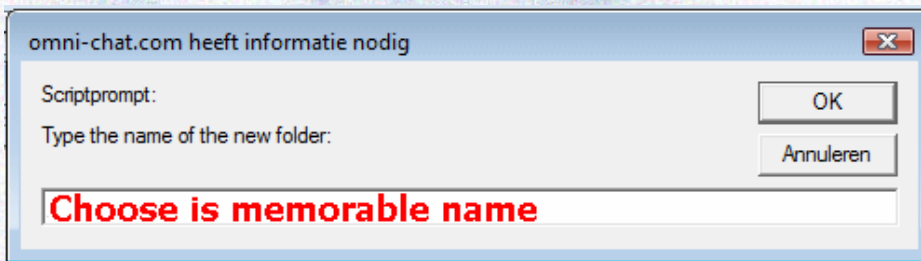

You can make your choice here and you enter the storage of that source type.

2. Here you can create folders for each source type and within a folder create subfolders. By clicking  you can also delete a (sub)folder.
3. In the left column you can select a folder. The name of the directory you're in, is displayed in the yellow bar.

Other features in this field are described below.

- Uploading and managing of your images.

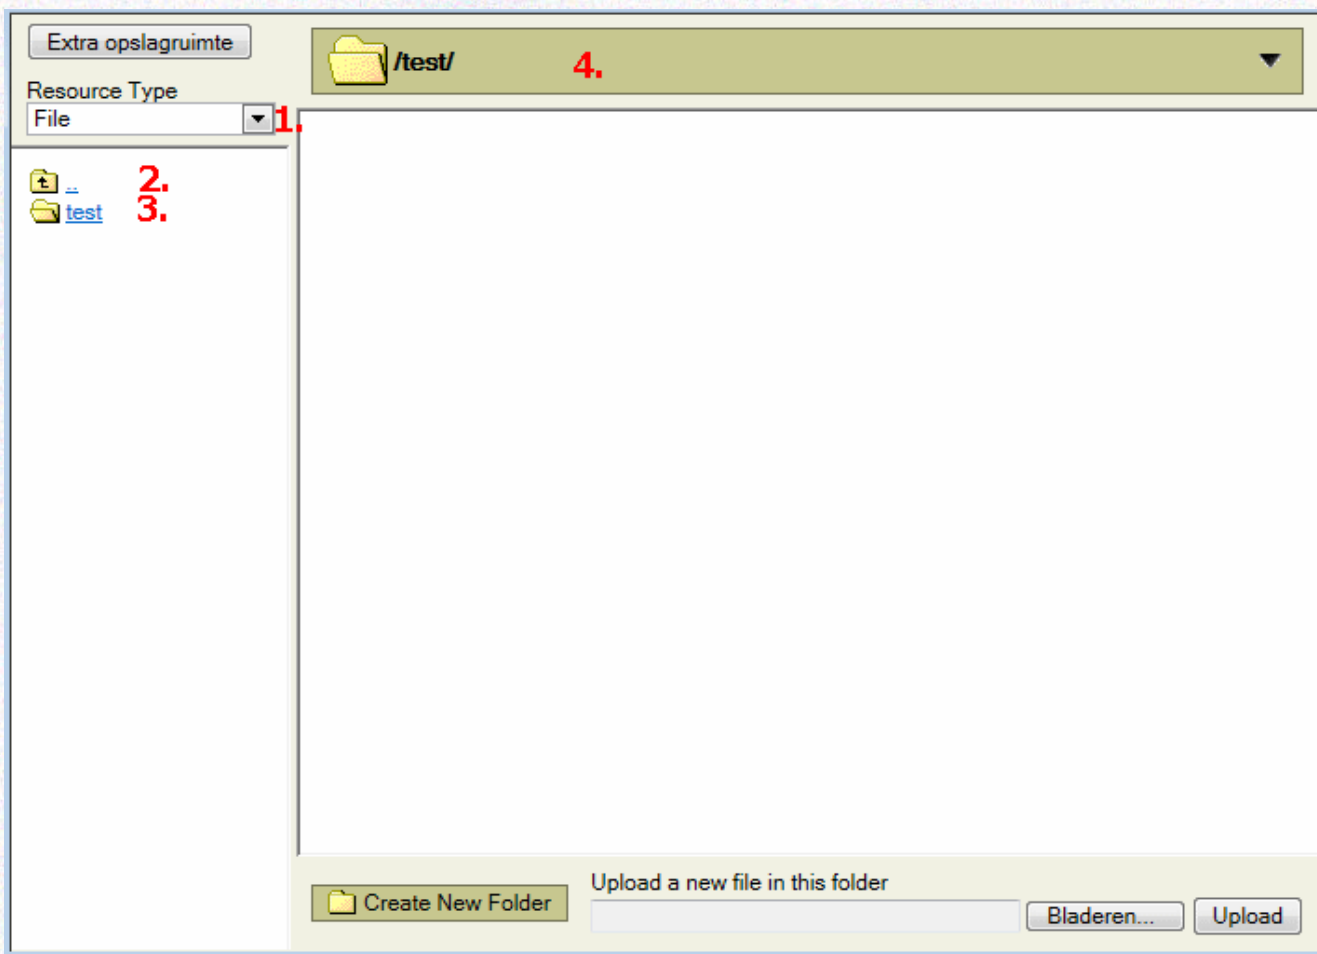

Click on "Create New Folder" and in the screen can appear the question to allow a temporary script window. In that case click "yes" and the following screen appears..

You can now assign a name to that folder and then click "OK". The folder will move alphabetically in the list..

Upload an image.

Each account has 3 MB of storage. To upload to your storage, first select what type of resource you want to upload. Then click "Bladeren" to browse.

To upload an image works as follows:

First make sure that by number 1. the correct source is selected, number 2. is the root of your storage place and the numbers 3. - 4. gives your active location..

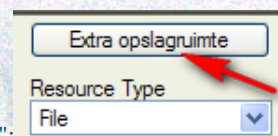

Before you start to upload, create a folder on your computer where you collect all the images you want to upload to your storage. Be sure that the images do not have any strange characters in the description. Choose short names and only use - or _ between the words in order to improve readability.

Then click on "Bladeren" and find the file you want to upload. Once these are found and selected, in the "Upload a new file in this folder" should appear the correct path where the files are located.

Now click "Upload" and the file will be uploaded in your storage on the Omni-Chat server.

- Create more disk space space.

Per account on Omni-Chat there is 3Mb of disk space free of charge included. If that is insufficient, you can easily and cheaply buy more space. You can keep all your images on your group together in one account. How this works, is explained below.

Go back to your storage space as explained above. Click on "Extraopslagruimte": <http://www.omni-chat.com/contact/feedback.php>

and you go straight to

From which country do you want to SMS

- Nederland
 België

Here you can make your choice and if you are done, the following text will appear:

How much extra diskspace do you want to order?

- 10 MB
 20 MB
 40 MB

Here you can specify how much storage you want. Make your choice and the following text

will show:

How much extra diskspace do you want to order?

- 10 MB
 20 MB
 40 MB

To order 10 mb extra diskspace from Nederland:

SMS GET 10MB to **3010**

You will receive 1 SMS's and in the last SMS will be the pincode you have to enter here.

Pincode:

Send Pincode

Costs:

One time

1,50 €/item

The costs for this order are in total **€ 1.50**
You will receive **1 SMS's**. They will cost **€ 1,50** each.

You may order as much extra diskspace as you want. Everytime you order, your diskspace will be increased with the amount of your order.

Each order is valid for 1 year. Before the year is over, you will receive an e-mail from us to remind you to re-order the extra diskspace. So you will not forget to re-order.

Attention! This is not a subscription service. You only pay for what you order, as stated above.

Make sure you order your extra diskspace on the right Omni-Chat account! Wrong placed orders can not be restituted. SMS-costs can never be repayed to you.

Just the cost at a glance:

10 MB: The cost of this order: total €1.50. You will receive 1 text message that costs €1.50 per message.

20 MB: The cost of this order: total €3.00. You will receive 2 text messages that costs €1.50 per message.

40 MB: The cost of this order: total €6.00. You will receive 4 text messages that costs €1.50 per message.

The content of the final screen also contains the method to expand your storage space.
